PRACTICE STATEMENT & CONTEXT

Michael Blackstone is an independent designer & developer operating across dimensions: creative direction, brand systems, 2D & 3D visual design + full-stack development.

In 2013, he established Propagation House: an independent multimedia house, design studio & think tank. Over more than a decade of active practice, the work has spanned foundational graphic + web design & advertising campaigns, virtual architecture, proprietary software, a 260+ page book, & live 3D WebGL commercial environments serving hundreds of thousands, sometimes millions of users.

[CORE SKILLS & PRODUCTION ARSENAL]

VISUAL DESIGN & UI/UX01 / FORM

/ Visual Design & Art Direction

/ UI & UX Design (Adobe, Figma, VizCom, Prototyping)

/ Brand Identity Systems & Style Guides

/ Typography & Editorial Layout (InDesign)

/ Design Systems & Component Libraries

/ Vector Illustration & Iconography

/ Responsive Mobile-First Web Layouts

/ Digital + Physical Commercial & Product Photography

/ XR / VR & Spatial Design

/ 3D Design & Rendering (Unity, Blender, Unreal Engine)

WEB ENGINEERING & SOFTWARE DEVELOPMENT02 / CODE

/ Full-Stack Web & Software Development

/ JavaScript & TypeScript (ES6+)

/ React & Vite Ecosystem

/ Desktop & Mobile Deployment (Tauri, Electron & Capacitor)

/ HTML5, Semantic Markup & Accessibility

/ Tailwind CSS, Fluid Layouts & Micro-Animations

/ REST APIs & Data Integration

/ WebGL & Canvas Interaction (Three.js)

/ Python Scripting & Automation Tooling

/ AI Integration & Agentic Harness Design (LLM APIs, Tooling, Automation)

/ Git / GitHub Version Control & Automated Deployment (Vercel)

OPERATING & SHIPPING03 / SHIP

/ End-to-End Delivery: Brief → Prototype → Design → Code → Ship

/ Direct Client Interface: Briefing, Scoping, Delivery & Support – No Account Layer

/ Editorial & Publishing: 260+ Page Book, Daily Web Publication, Weekly Newsletter

/ Technical Documentation & Specification Writing

/ Civic Parks Project Advocacy

[FOUNDATION] MULTIMEDIA, VISUAL DESIGN, WEB & BRAND SYSTEMS

DISCIPLINARY BEDROCK · UNIFYING DESIGN & CODE

A multidisciplinary work history rooted in end-to-end commercial execution: visual design, interactive web development, brand identity systems & creative direction, balancing design skill & technical ability to deliver cohesive visual identities & high-performing web experiences for Fortune 500s, government, & international clients.

[WORK HISTORY & PROJECTS]

VERIFIED PRODUCTION RECORD

01 // INDEPENDENT STUDIO & BRAND

PROPAGATION HOUSE

Founder, Principal Designer & Developer ·

2013–PRESENT · ACTIVE

Bellingham, WA

An independent design studio & think tank building agentic software, WebGL experiences & real-time 3D environments for VR, XR, desktop & mobile — with applied AI research & integration alongside virtual architecture, brand environments, proprietary tools & published works.

✦ Branding (2D + 3D & Spatial Design) · Creative Direction · Advertising · Consulting · Game Design · Systems Design · AI Integration · Cross-Platform Development

02 // CORE PLATFORM

SUBSTRATE

Agentic Design & Development Software

2025–PRESENT · ACTIVE

An agentic system, design & development tool that turns a machine from an inanimate silo into something conversational, proactive, autonomous. Model-independent by design — paired with API keys, it dynamically loads any model online, runs entirely offline via preferred model library, or takes a hybrid approach with both. It learns patterns, remembers user context, adapting into a uniquely tuned agent specific to each installation.

✦ Python · JavaScript · HTML · CSS · Electron + Node.js · Desktop + Android

03 // CIVIC ARCHITECTURE & AI

UN GENERAL ASSEMBLY HALL — COP30

commissioned through UNDP Brazil

2025

A reconstruction & reimagining of the UN General Assembly Hall, built floor by floor in virtual 3D WebGL to host global climate summits at scale — an international space created for press, educators & delegates to come together. Engineered a landmark working government AI chatbot into a 3D browser space, trained on UN climate change data alongside real-time 7-language AI translation streams.

Coverage: CNN, UNDP, COP30 Wire

04 // SPATIAL & COMMERCE

WALMART UNLIMITED

with Walmart, Spatial.io & Martian Blueberry

2024–2025

A three-part shoppable game series that turned Walmart's Unlimited catalog into a real-time 3D shopping space in the browser — playable worlds where every item is a live SKU with instant zero-install checkout, built on Spatial with game mechanics wired directly into Walmart's backend.

✦ 1M+ Users · ✦ 5.4% SKU Conversion · Coverage: Inc., AdAge, Retail TouchPoints

05 // PLATFORM ARCHITECTURE

SPATIAL.IO — REAL-TIME 3D WEBGL PLATFORM & COMMERCE

Contracted Hire & Creative Collaborator

2024–2025

Collaborative engineering & commercial execution on Spatial's WebGL engine: high-concurrency multiplayer networking, interactive 3D spatial commerce pipelines, instant zero-install browser checkout hooks & fluid cross-platform interaction design serving global audiences. Worked directly with Spatial's dev team & leadership as both creative collaborators & contracted hires.

✦ Consulting · 3D Design · Unity · WebGL · C# & C++

● hours & availability negotiable
